Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 8, final two lines: ", preferably ranging from –50 to –25°C" has been deleted.

Examiner's Comment

Authorization for this examiner's amendment was given in a telephone interview with applicants' representative, Mr. Krebs, on October 10, 2006.

The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

Moore et al is pertinent to anionic polymerization of a purified feedstock comprising a mixture of styrene and α-methylstyrene monomers (note Example in col. 11). Malanga and McCormick et al are pertinent to the preparation of α-methylstyrene polymers via anionic polymerization.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowable over the closest prior art of GB '897. GB '897 describes the preparation of poly(α-methylstyrene) in an aprotic non-polar solvent (*viz.*, toluene per Example 1) as well as the addition of a polar solvent to increase reaction velocity (page 1, II. 29-31).

The claimed subject matter differs from the cited disclosure principally in the requirement for the use of two different solvent types in successive process stages, i.e., nonpolar aprotic solvent in the stage of preparation and polar aprotic solvent in the stage of propagation. This difference is considered patentably distinguishing. In particular, the claimed addition of a polar aprotic solvent in stage e) (propagation of polymerization) in an amount which is lower than that of the non-polar aprotic solvent used in stage a) (to prepare the monomer solution) is not taught nor fairly suggested in GB '897 or any other prior art documents located or identified by the examiner.

Accordingly, claims 1-13 are deemed to define allowable subject matter and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
